

Growing Connoisseur Level Buds

Has Never Been This Easy – Because Now You Don't Even Have To Balance Your pH

"Thirstin Howl III"

PH PERFECT TECHNOLOGY

CONNOISSEUR

If you'd like to grow connoisseur level buds with relatively zero work – then here's how we did it in Bulgaria and how you can do it too.

First, you'll need guardrails along the pH highway

Balancing pH has always been a pain. Until now. With pH Perfect® Technology, you'll always be in the sweet spot between 5.5 and 6.3 – with zero work on your part.

All you've got to do is make sure you're using the right water – either R/O water or something close (100 ppm [EC 160 µS/cm]), and pH Perfect Connoisseur will do the rest.

No pH Up or pH Down. No more pH pens. Just pour your nutes and watch the magic happen.

Second, you'll need a brilliantly designed base nutrient

And what if we told you that the same base nutrient that will automatically balance your pH for you is so brilliantly designed, Einstein himself would give it two thumbs up?

It's said that Albert Einstein called compound interest the most powerful force in the universe. Our team of 21 PhDs, led by a man named Dr. Savov, developed pH Perfect Connoisseur with this in mind.

Drawing from a Japanese engineering breakthrough called "kaizen" (pronounced k-eye-zen), our team has applied the power of compound interest to developing a base nutrient for your high-value plants.

Here's how they did it:

Kaizen is all about making small changes at every opportunity, so that in the end, you have big results. Just like compound interest. So, in a leading Bulgarian research facility, Dr. Savov and his team applied kaizen to the development of pH Perfect Connoisseur.

The team realized there were three areas they could improve over standard base nutrients.

1. The selection of the nutrients themselves. They wanted facts, not superstition or hearsay. So through a series of exhausting plant-specific, tissue sample tests, the team isolated every variable they could. Then, they asked a series of small questions. Including, what's really going on here?

Can we improve this element in some small way? Can we improve the way it works with everything else? When they were finally able to answer all of these questions with authority, the results of the formula they'd come up with were breathtaking.

2. The delivery process. Once they had optimized the nutrient selection, they realized it would all be a gigantic waste if this new formula, as powerful as it was, couldn't be absorbed easily and reliably by your plants. So they tested surfactants, amino acids, and every imaginable ingredient or combination of ingredients they could.

When this step was finished, the plants they fed their new formula to couldn't help but absorb every last drop.

3. Any loose ends? This is where our team discovered a real prize, where there was the potential for huge leverage... over not only the industry standard, but even Advanced Nutrients' best developed nutes so far.

The point of leverage was in plant bloom metabolism and floral production. These were weak links in the armor of most base nutes, and when Dr. Savov's team discovered them, the team did what they do best. Patiently, ardently, they went to work. Now, when you buy pH Perfect Connoisseur, you have a base nute with the power to rival entire stacks of standard bloom boosters.

It all worked better than they imagined, and Connoisseur has been the world's most advanced base nutrient since it was released. Now with pH Perfect Technology, you'll be unstoppable. And it will be easy.

Some Benefits You Can Expect From pH Perfect Connoisseur, The Most Advanced 2-Part Base Nutrient In The World For Growing High-Value Plants

- **pH Perfect Connoisseur** includes 100% chelation of all macro, secondary and micronutrients. This built-in chelation "safety net" gives your plants rock solid protection against poor water conditions and harmful pH extremes.
- You'll enhance your bloom phase dramatically, without increasing the time it takes to reach harvest. You'll be growing more in less time than you're used to, and you'll easily keep your growing schedule.

Read what growers are saying about pH Perfect Connoisseur

- Joseph Bates** "Connoisseur!!!! It's worth it. And while you're at it bump up to Hammerhead. A true PK booster."
- Jason Frank** "I love Advanced Nutrients' Connoisseur A&B, it gives me the best base nutrients to give to my plants in any stage they may be in!!!"
- Kevin Hessler** "I love Advanced Nutrients!! I've tried ALL the other brands & A.N. silly out does them all! Connoisseur & BIG BUD produce AMAZING results!!"

- You'll maximize aroma, taste and see truly great color in your plants. If you want your product to be more marketable, to be able to charge more and have clients happy to pay you, then pH Perfect Connoisseur is your new bff.

But don't take our word for it. Let us prove to you that pH Perfect Connoisseur is not only our flagship product, but the pinnacle of hydro growing technology

We're very proud of the work our team of scientists has put into pH Perfect Connoisseur. Connoisseur has been the best around for awhile. With pH Perfect Technology included, no one else even comes close. But we understand that your concerns are with your plants. Not with our competition.

So let us take all the risk out of the deal. When you buy pH Perfect Connoisseur, you've got a safety net. If you're not thrilled with the results, and how easy it is to grow such mouth-watering, profitable flowers, return it for a full and immediate refund. Trust begets trust so, we'll take your word for it.

➔ **What are you waiting for? Deals don't get much better than this. Visit your local hydro store and ask for pH Perfect Connoisseur today.**
