

PRODUCT DATA SHEET

LIQUID FERTILIZER

FISH•MIX™

WHAT IS FISH•MIX™

This rich infusion of organic fish emulsion from the North Sea, mixed together with extract of Dutch sugar beet helps accelerate the growth of all living organisms in the substrate. It also stimulates the production of microorganisms and useful bacteria in all types of soil and coco-based substrates. And it's good to know that, in keeping with our strict organic farming requirements, Fish•Mix™ is not extracted with acids or stabilised with BHT (butylated hydroxytoluene) – a synthetic preservative.

Even after a few days of use, it will have transformed poor quality earth into rich, fat soil – full of the natural minerals your plants are hungry for.
