Water Quality Table

DATE	MAJOR EVENTS (notes)

DATE													
TEST													
Ammonia													
Nitrite													
Acidity													
Alkalinity													
GH													
Nitrate													
Phosphate													
Additives Since previous test date													
pH up													
pH down													
Iron													
Water													
Topped up													
Exchange													

We suggest recording these tests on a weekly basis, though some - particularly pH, but also Ammonia and Nitrite in the early stages - may need testing more frequently.

In Major Events, record: additions of fish; planting; fish losses; fish harvest; plus any other information that may be relevant
